

Metasploitable 2 Nmap Scan Report

Metasploitable 2 Nmap Scan Report

****Scan Date:**** 2025-05-03

****Target IP:**** 192.168.0.110

****Scan Tool:**** Nmap

What is Nmap?

Nmap (Network Mapper) is a tool used to find open ports and services running on a system. It helps identify which services might be vulnerable to attacks.

Why This Scan Was Done?

This scan was performed on a virtual machine called ****Metasploitable 2****, which is purposely made vulnerable for ethical hacking and learning.

Found Open Ports and Services

Port	Service	Version	What It Means
-----	-----	-----	-----

Metasploitable 2 Nmap Scan Report

21	FTP	vsftpd 2.3.4	Used for file transfer. This version has a backdoor (can give remote access).
22	SSH	OpenSSH 4.7p1 Debian 8	Used for secure login. This version is old and could be brute-forced.
23	Telnet	Linux telnetd	Allows remote login, but not secure (no encryption).
25	SMTP	Postfix smtpd	Used to send emails. Can be checked for open relay.
53	DNS	ISC BIND 9.4.2	Handles domain name resolutions.
80	HTTP	Apache 2.2.8	Web server running. May host vulnerable web apps.
139	SMB	Samba smbd 3.x.x	File sharing over network. This version is vulnerable.
445	SMB	Samba smbd 3.x.x	Same as above.
3306	MySQL	MySQL 5.0.51a	Database server. Try weak or default passwords.
5432	PostgreSQL	PostgreSQL 8.3.x	Another database. May have default access.
5900	VNC	Protocol 3.3	Remote desktop access. May not have a password.
6667	IRC	UnrealIRCd 3.2.8.1	Chat server. Has a known backdoor vulnerability.
8180	HTTP Alt	Apache Tomcat/Coyote JSP	Web server alternative port. Check for admin panels.

What You Can Try

These are the steps you can take after the scan:

- **Exploit FTP:** Use Metasploit module for `vsftpd 2.3.4`.
- **Check Web Services:** Visit `http://192.168.0.110` in browser. Use tools like `nikto`, `dirb`, or

Metasploitable 2 Nmap Scan Report

`gobuster` to find hidden pages.

- **SMB Enumeration:** Use `enum4linux` or `smbclient` to gather shared folder info.
- **Brute Force:** Use `hydra` on SSH, FTP, or MySQL with common usernames/passwords.
- **IRC Exploit:** Metasploit module available for UnrealIRCd backdoor.

Final Thoughts

Metasploitable 2 is made for practice, and this scan helps you identify which services can be exploited. Always test legally and ethically.
